

Bibliographia

CURRENT LITERATURE

Compiled by ROSS H. ARNETT, JR.

This section is designed to contain all papers on the Coleoptera of North and South America which are not in the Leng (1920) catalogue or the supplements, or papers containing new species and records not included in Blackwelder's Neotropical checklist and which have not been previously listed in *The Coleopterists' Bulletin*.

Additions to the list of publications available:

Bull. Zool. Nomencl.—The Bulletin of Zoological Nomenclature.

Agric. Tecn.—Agricultura Tecnica

Ann. Soc. Ent. France—Annales de la Société entomologique de France.

Mitt. Münchner Ent. Ges.—Mitteilungen der Münchner Entomologischen Gesellschaft.

Kol. Zeitschr.—Koleopterologische Zeitschrift.

Proc. Trans. South London Ent. Nat. Hist. Soc.—Proceedings and Transactions of the South London Entomological and Natural History Society.

Corrections:

Proc. Roy. Ent. Soc. London (A)—Proceedings of the Royal Entomological Society of London, series A.

Proc. Roy. Ent. Soc. London (B)—Proceedings of the Royal Entomological Society of London, series B.

Trans. Roy. Ent. Soc. London—Transactions of the Royal Entomological Society of London.

And more than read it, we should take every possible step to bring this important subject to the attention of all concerned, to support this idea either by agreement, or by constructive

criticism. It is a matter which should not be left back in the deep recesses of our memories but rather a matter which should have our most active and immediate attention.]

Hardy, G. A. 1950. Notes on Vancouver Island and West Coast Coleoptera. Proc. Ent. Soc. Brit. Columbia, vol. 46, p. 18. **Crowson, R. A.** 1950. The classification of the families of British Coleoptera. Ent. Mo. Mag., vol. 86, pp. 149-160. [Keys, illus.] Incomplete, paper stops in the middle of a key. This is a very important paper because it deals with the classification of all beetle families, not just the British representatives. The characters found in the adult and larva, habitat, and distribution are all considered. A remarkable piece of "foundation" work.)
